

# COMPONENTS AS BUILDING BLOCKS

## COMPONENTS

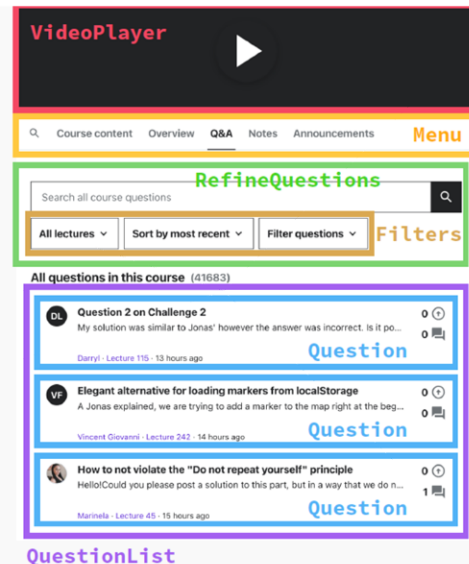

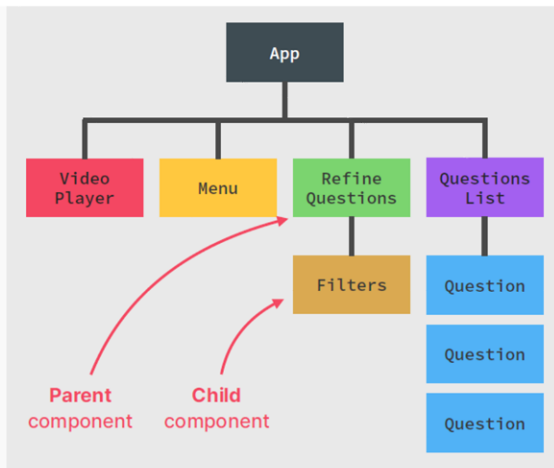

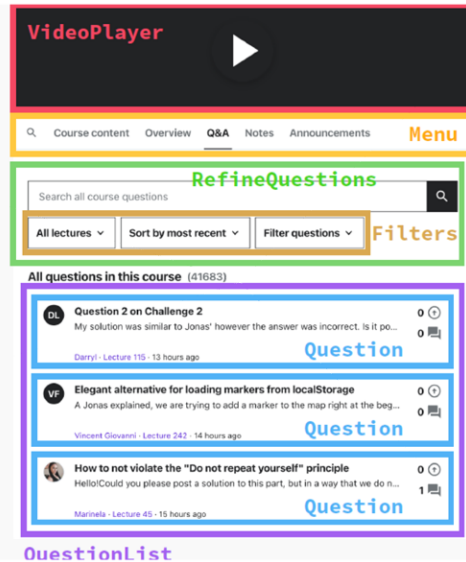

- 👉 React applications are entirely made out of components
- 👉 **Building blocks** of user interfaces in React
- 👉 Piece of UI that has its own **data**, **logic**, and **appearance** (*how it works and looks*)
- 👉 We build complex UIs by **building multiple components** and **combining** them

## COMPONENTS

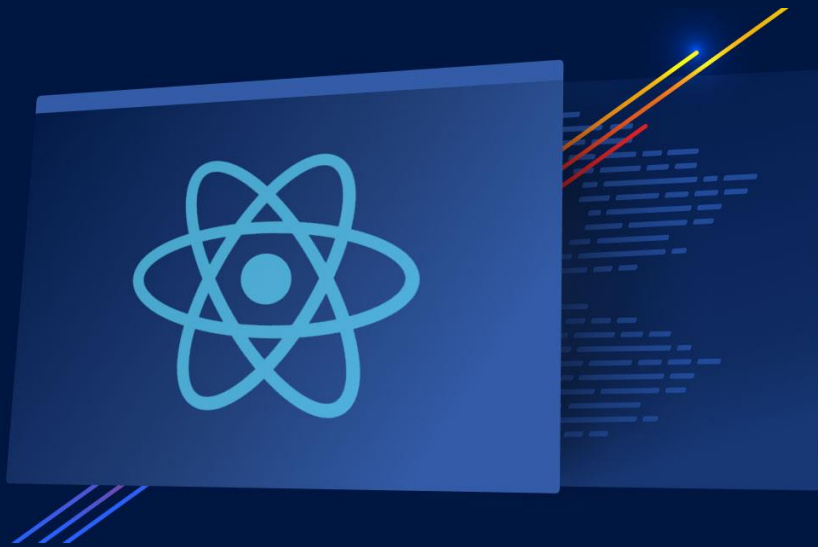

- React applications are entirely made out of components
- Building blocks** of user interfaces in React
- Piece of UI that has its own **data**, **logic**, and **appearance** (*how it works and looks*)
- We build complex UIs by **building multiple components** and **combining** them
- Components can be **reused**, **nested** inside each other, and **pass data** between them
