

HOW NOT TO SELECT DOM

```
import React, { useEffect } from 'react'

const Search = ({ query, setQuery }) =>
{
  useEffect(() =>
  {
    const el = document.querySelector(".search");
    el.focus();
  }, []);

  return (<input className="search" type="text" placeholder="Search movies..." value={query} onChange={(e) => setQuery(e.target.value)} />);
}

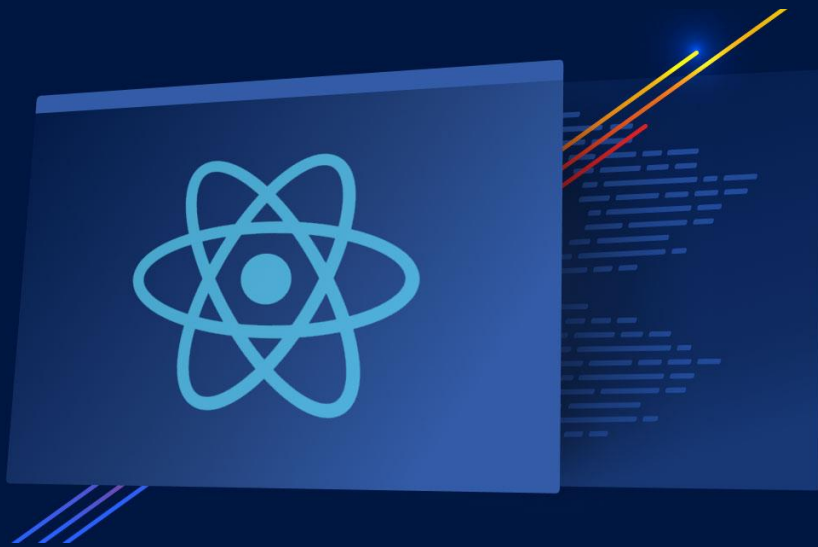

export default Search;
```
